

**Providence Pellet
Insert Stove**

Thelin Hearth Products is proud to introduce:

The Providence Pellet Insert Stove

1 No Fuss, No Muss

The Thelin Providence is the easiest pellet insert stove to clean and service on the market today. Innovative maintenance features include direct front access to the flue allowing for effortless cleaning without removing the insert, a track system for easy accessibility and special vacuum ports that make cleaning painless.

2 Backup Power When You Need It

Gain freedom from power outages with Providence's onboard power back up system. The Providence is the only insert on the market that provides an optional 12 volt battery that automatically keeps the stove running in the event of a power outage.

3 And Power To Spare

With Thelin's unique trickle charge system, the battery will automatically recharge when power is restored.

The Providence also provides auxiliary battery capabilities through easily accessible banana connectors. Adding a larger external battery is easy to do and provides more protection against long duration power outages. Using only 35 watts of power, the Providence is so efficient that it will run for days with a properly sized battery.

4 Room To Grow

Most inserts on the market today are only available with fixed hopper sizes. The Providence hopper is fully adjustable from 22" to 26" to provide maximum hopper capacity for each size fireplace opening.

5 Breathe Easy

The Providence's air filtration system provides a washable filter that is designed to keep dust from being drawn into the convection passageways of the insert and to clean room air during operation.

The Thelin Providence Pellet Insert is available in three great looking models

The Providence Classic – A traditional stove featuring classic styling with fine furniture detail.

The Providence Contemporary – A fashionable model featuring curved decorative panels.

The Providence Signature – Our top-of-the-line model includes all of the decorative and accessory options available. The homeowner has a choice of stone, tile or natural wood inlays for the hopper door, top front panel and ash drawer. In addition, the Providence Signature has an attractive logo fireback and a decorative crown accent that compliments the refined classic appearance of the natural panel inlays.

Standard features for all models include:

- Easy access cleaning ports
- Quick disconnect flue outlet
- Vacuum assist clean function
- Washable convection air filter
- Advanced heat exchanger
- Adjustable hopper
- Brushless feed motor
- Air wash system
- Trickle charge system
- Auxiliary battery system
